

MULTI-FUNCTION TERMINAL

[VOICE MESSAGE]

Real communication tool, the I@N alarm unit allows you to record voice messages that can be heard by the whole family.

[CHIME FUNCTION]

To be advised as soon as someone enters or leaves your home.

[SPEECH SYNTHESIS]

For a user-friendlier use, the I@N alarm unit emits sound signals and voice messages giving you information about the system status.

[ACCESS MONITORING]

In addition to the event log, real random access memory of the system, I@N gives you the opportunity to monitor accesses, which allows you to know exactly who puts your system on / off and when.

BECAUSE YOUR SAFETY CAN NOT BE IMPROVED...

... for more than 50 years, the INTERVOX SYSTEMES Group has been sharing with you its experience and know-how in conceiving and manufacturing alarm units. Through its different SurTec® residential protection systems, we offer you quality products adapted to your lifestyle.

All our residential alarm transmitters integrate the latest radio modem technologies, with powerful microprocessor and enhanced bandwidth.
